

ENVIRONMENTAL POLICY STATEMENT

Senior Management endorses this Environmental Policy and ensures that it is communicated, understood, implemented and maintained at all levels within the Company and ultimately, that it achieves its intended outcomes.

Senior Management promotes and is committed to the continual improvement of the Integrated Business Management System (IBMS) to enhance its environmental performance and minimise its ongoing impact on the global and local environment. This is facilitated through the setting of environmental objectives based on its significant environmental aspects, compliance obligations and considering its operational risks and opportunities. The results of which are communicated to interested parties, where appropriate the Company is committed to ensuring that it:

- Complies with all compliance obligations, where these relate to its environmental aspects and ISO 14001:2015.
- Provides employees and others with the resources needed for the BMS, including support, direction and encouragement to fulfil the requirements, commensurate with their role.
- Strives to integrate the IBMS into all business processes.
- Considers the environmental lifecycle of products, prevents pollution and meets other specific relevant commitment(s).
- Manages and minimises its wastes by reducing its waste generation and by segregating, re-using and recycling waste where economically and operationally feasible.
- Uses and monitors the use of energy, water, materials and other natural resources as effectively as possible, giving particular regard to the lifecycle, and long-term sustainability of consumable items.
- Manages and seeks to reduce the carbon emissions of plant, machinery and vehicles by way of alternative methods of motive and operational power, including electric and potentially hydrogen power, vehicle sharing, journey planning, local employment and use of local suppliers, where practicable to do so.
- Develops, maintains and regularly reviews action plans for the further reduction of carbon emissions and to aim for zero carbon operations up to 2030
- Manages the transport of both labour and materials to and from work-sites to minimise travel and cut carbon emissions to a practicable minimum
- Ensures that the environment and carbon emissions are considered in the procurement of goods and services and seeks to minimise the transport of these to sites.
- Gives appropriate consideration for protecting the environment in the goods and services it provides to customers.
- Considers and addresses the needs of relevant parties in respect of considering the effect of climate change on its operations and the global/local environment
- Supports other relevant management roles to demonstrate leadership as it applies to their areas of responsibility.

P A Collacott & Co hereby certifies that the Scope of the IBMS and all associated documentation accurately describes its use within the Company such as to meet the requirements of ISO 14001:2015.

The IBMS will be monitored, measured, evaluated and enhanced regularly under the Senior Management's ultimate responsibility, with regular reporting and communication of its status and effectiveness at all levels.
